About your consultation...

Your dentist has requested that you attend our laboratory for an initial shade consultation. Our goal is to make your restoration blend in with your natural teeth and we pride ourselves on achieving this.

The appointment usually takes between 5-10 minutes and is completely pain free.

You may be asked to attend a second appointment at a later date. Some restorations may require subtle alterations to achieve the best possible result. We strongly suggest that you attend a second consultation for front teeth restorations. We may ask that you make yourself available for approximately an hour for this appointment.

Ladies: We ask that you remove any lipstick prior to attending due to a chromatic phenomenon that may cause the incorrect shade to be selected.

Ceramic Studio carries-out all work in-house and nothing is outsourced overseas. We only use the most advanced materials that are approved by the *Therapeutic Goods Administration (TGA)*. For further information, please find us on the *Australian Made* consumer website at australianmade.com.au. There is no charge for any of these services.

We look forward to seeing you soon!
